

SharePoint Engineer:

Are you passionate about Microsoft SharePoint and related technologies? Do you enjoy learning and applying the intricacies of the latest release to solve data and document management and workflow issues?

Are you the most talented member of your team? Are you the person your team members come to for help when they are stuck and Google is no longer a friend?

Do you thrive in a challenging environment? Are you considered an innovator by your peers? If so, you may want to join the Omnitech Team.

Omnitech, Inc., an industry leader and growing technology solutions company, is expanding software development operations and is currently seeking a **SharePoint Engineer**. As an Omnitech SharePoint Engineer, you will be using the latest programming tools and techniques for creating highly customized and complex applications. You will be challenged daily to excel in our dynamic and varied development environment.

This position requires a candidate with strong interpersonal and self-motivational skills in order to meet strict internal and external deadlines. You must be a fluent communicator with both fellow team members and company clients. You must be able to apply your analytical skills to deftly troubleshoot and resolve development issues as they arise.

Responsibilities:

- Take ownership of SharePoint development process from design through maintenance;
- Design, develop and test applications to automate and streamline business processes;
- Coordinate with network engineering, end users and DBAs to implement SharePoint solutions that use client best practices and that meet corporate objectives;
- Deploy SharePoint solutions and assist users within a variety of business contexts;
- Manage SharePoint servers (web and database);
- Coordinate and perform backups and restores of entire SharePoint installations as well as individual sites and collections;
- Mentor less experienced team members, and constructively challenge the established technical knowledge of the SharePoint development group;

- Conduct client support related to any and all Omnitech development projects;
- Work both on-site at Omnitech or off-site at client locations;
- Assist with project estimating and proposals;
- Consult with clients;
- Produce timely and accurate reports of work completed;
- Perform and communicate in a team environment.

Requirements:

- Bachelor's Degree in Information Technology, equivalent technical degree, or extensive IT experience;
- Must have 3 to 5+ years of experience and knowledge with SharePoint Server 2007 (MOSS 2007) and 2010 (MOSS 2010), Windows SharePoint Services 3.0 (WSS 3.0) administration, design and support;
- Minimum 3 years of software development experience coding C# and VB.NET, developing and maintaining SharePoint sites, supporting and working with MOSS 2007, 2010 and WSS 3.0 using Visual Studio and SharePoint Designer;
- Strong experience writing stored procedures, creating tables/views/etc. in SQL Server 2005/2008;
- Strong experience in developing and utilizing SharePoint components including web parts, templates, forms, content management, business intelligence, and workflows;
- Must have developed SharePoint solutions using Microsoft .Net technologies framework including: ASP .Net 3.0/3.5, C#, XMT, AJAX, SQL Server 2005/2008, Visual Studio 2008/2010, SharePoint Designer 2007 and 2010 and MS InfoPath 2007;
- Candidate should have experience in gathering/documenting/analyzing requirements;
- Experience in SharePoint web services, SPS/MOSS API and workflows;
- Experience in SharePoint server management, support and troubleshooting;
- Experience in software development life cycle;
- Strong communication skills required for interfacing with our users.

Personal Characteristics:

- Energetic, comfortable working in a fast-paced environment;

- Hard-working and motivated, able to take initiative and meet deadlines;
- Comfortable working in a diverse, team-based environment;
- Detail oriented, well-organized and excellent ability to multi-task;
- Excellent communication, presentation, and interpersonal skills;
- Confident with customers and business partners;
- Possesses a hands-on attitude in a friendly work environment.

If you love to work with SharePoint and are interested in being part of an exciting and growing company, please apply. If you have what it takes to support our organization, please send your resume and salary requirements via e-mail to jrustan@omnitech-inc.com.
